One is to provide adequate sociological perspectives so that the basic concepts relating to family are expounded in their social setting. The next objective is to give an overview of some of the current problems arising out of the foundational inequalities writ large in the various family concepts. The third objective is to view family law not merely as a separate system of personal laws based upon religious but as the one cutting, across, the religious lines and eventually enabling us to fulfill the constitutional directive of uniform civil code. Such a restructuring would make the study of familial relations more meaningful.
